Hi [First Name],

Here's a little tip that we like to share with almost everybody who loves a good cup of joe. Grind it just before you drink it.

You see, coffee begins to lose that good coffee smell soon after it's ground. So the bag you ground on Monday ends up tasting a bit flat by the time Friday rolls in. Quick tip, only grind what you need, so that you can enjoy each cup the way it was meant to.

A few small habits that help

- Keep your beans in a sealed container, somewhere cool and dark.
- Skip the fridge. It's damp in there, and coffee soaks up smells.
- Grind a little before each cup, even if it feels slower.

All of these only take a few minutes, but the difference is easily noticeable.

If you haven't tried our coffee yet, your first bag is 20% off, and you can skip, pause or cancel anytime.
